Ok, I do see the TOC Widget bug with the Viper Mobile Runs layer. I will need to check out the MXD and data for that service. Where can I find that?

Subject: Flex stuff

Brett

Can you start working on this stuff?

Updates for the Viewer – 3.0 West Viewer -
http://gis.eparesponsemanager.net/r6/WestFertilizer/

-
1. Implement the extent grabber widget on the current ER Flexviewer (It is version 3.0)
2. Move over any of the missing widgets from the 3.1 Viewer
    a. EPA Facilities Search
    b. Buffer Tool
    c. Add Layer from Web.

Updates for the Viewer – 3.1 West Viewer -
http://gis.eparesponsemanager.net/r6/WestFertilizer_3_1/

1. Implement the fix you did to the Extent grabber widget on this viewer.

PDO Viewer – Current Version

Bugs noticed:
1. Data Layers and Legend widget needs to be checked out – after you check a layer on then turn it off the ability to check another layer on and off goes away. Check out the WestFertilizer 3.1 viewer for the response specifically on the VIPER

Additional Things to look at.

1. Update SOP for Flexviewer 3.0. we see something's that are different in the config file and the widgets need to be updated.

Also something's we noticed as we advance in versions icons and hover names of tools change. I think this is something for the users we should try to keep consistent.

Call me if you have questions

Thanks
